Over 350 Million people are affected by depression worldwide. 80% of individuals affected by depression do not receive any treatment. The number of patients increases by approximately 20% per year. Depression often co-occurs with other illnesses and medical conditions.

Your body is very powerful and can overcome any illness. Music is known to have the ability to help your body heal and uplift your spirit.

Enjoy the healing power of music!

This event is a combination of delightful music composed and performed by Tom Powers and his presentation on his journey of self healing and activating your full potentials.
